Jack Treadwell

Charlotte, NC (relocating Jan 2027) · jack.treadwell.dev@gmail.com · jacktreadwell.com · github.com/flambeauRiverTours

PROFILE

Senior .NET engineer with 8 years of experience, focused on healthcare billing and regulated software, including 3years managing a team of 9 developers.

SKILLS

Languages: C#, TypeScript, JavaScript, SQL, M (MUMPS)
.NET & Frontend: .NET 10, WPF, MVVM, React, HTML/CSS
Testing: xUnit, Moq, unit & integration testing, TDD
CI/CD & DevOps: GitLab CI/CD, GitHub Actions, Azure DevOps, Git, SonarQube, OSV-Scanner, SBOM (CycloneDX)
Cloud: Azure (Functions, Static Web Apps, SQL, Blob Storage), Bicep

EXPERIENCE

SPIE SAG GmbH, Berlin, Germany · Senior Software Engineer · Aug 2024 – Present

- One of 3 engineers migrating a VB6 application with more than a million lines of code for modeling, designing, and monitoring high-voltage power lines to .NET 10. Pilot released to target customers.
- Introduced automated testing and coached the team on TDD, establishing QA processes from scratch using xUnit, Moq, and Husky pre-commit/push checks, raising coverage from 0% to 39% in two years.
- Designed and implemented a proprietary integration testing engine to validate core and customer-specific workflows across local and pipeline environments, saving an estimated 20 hours per week of manual developer testing.
- Designed and built GitLab CI/CD pipelines covering automated testing, security analysis via SonarQube and OSV-Scanner, compliance through SBOM generation via CycloneDX, and code signing and protection via AxProtector, enabling weekly releases with < 10-minute builds.

Epic Systems Corporation, Madison, WI · 2018 – 2024

Software Developer Team Lead · Mar 2021 – May 2024

- Led and managed 9 developers building billing software and ran day-to-day planning, 1:1s, performance reviews, onboarding, and coaching.
- Instituting triage and load-balancing processes to rapidly assess and fix bugs, achieving the highest-quality releases for our owned functionality in 3 years as measured by high-priority issues traced to the release.
- Led technical strategy sessions with customer executives to understand their needs and brainstorm healthcare charging software solutions such as a charge calculator matching updated the 2021 E/M office-visit billing guidelines.
- Fixed 3x the company-wide median bug count while consistently delivering clean, unit tested code.

Software Developer · Jun 2018 – Mar 2021

- Designed and implemented a UI used 3 million times per month to support charge calculation based on government regulations and customer end user feedback.
- Architected a telehealth charging module used 1.5 million times per month on a rapid timeline at the start of the COVID-19 pandemic.
- Translated changes in US and Norwegian physician charging regulations into software requirements for teams across Epic, and built the implementation for the team's own application.
- Rapidly prototyped software solutions while onsite in Norway, delivering a significant quality of life improvement to users outside the release schedule.

PROJECTS

Real-Time Fantasy Football Scoreboard · github.com/flambeauRiverTours/FantasyFootballWebsite · Aug–Oct 2026

- Built a real-time leaderboard and analytics site for a fantasy league using React, .NET web server, Azure Functions, Static Web Apps, and Blob and SQL storage, GitHub Actions.
- Achieved < 5 s latency for real-time statistic updates at < $0.25/month cloud costs.

EDUCATION

Wake Forest University · BS Physics and Computer Science, cum laude · 2018
